
Economic Consultant

We are looking to hire bright and creative graduates and post-graduates with a quantitative degree to join our leading-edge economic consulting business at our Frankfurt office.

Who is Fideres?

We are a rapidly growing and innovative economic consulting and analytics company focusing on market manipulation and antitrust litigation. We believe in fair and transparent markets. Fideres' mission is to enable our clients to protect and enforce their rights.

Our clients are based around the world and include international law firms, hedge funds, pension funds, insurance companies, regulators, etc.

Our services include:

- economic research;
- quantitative/data analysis and analytical services (economic, statistical, and industry analysis, as well as building pricing models) to analyse complex legal claims and estimate damages.

We use economics and quantitative data to enhance legal cases and utilise data to produce actionable information for our clients.

We regularly feature in the major international press (BBC, Financial Times, Bloomberg, Reuters, etc.) for our high profile work including investigations into:

- Banks' financial benchmark rigging: LIBOR and FOREX
- Pricing collusion in the US Pharmaceutical industry

Please check our website (www.fideres.com) for more information about Fideres and our recent work and press, especially Publications and Media sections.

Where are we based?

We have offices in London, New York and Frankfurt.

What profile are we looking for?

The ideal candidate will be self-motivated, driven to achieve high standards in their work output, innovative and interested at the intersection of economics, finance and the legal sector. We are looking to hire individuals who are interested in working for a business that is at the leading edge of its field and contributing to the growth and success of our business.

What will your responsibilities involve?

- Conducting market research and analysis on different industries, screening for potential anti-competitive behaviour
- Creating and using various econometric modelling techniques to identify anomalous pricing structures across a variety of markets and regions
- Writing comprehensive reports that summarize key findings in a simple, succinct manner
- Verbally presenting key findings internally to the management team and to clients in a manner that allows them to understand both the results and how they impact their clients

Required Skills

- Knowledge of key micro-economic topics such as; supply and demand, market structure, cartel theory and game theory.
- Strong PC skills including Microsoft Office, in particular Excel, Word and PowerPoint, and Bloomberg
- Solid understanding of stochastics and statistical inference, or willingness to learn
- Competent in, or willing to learn, at least one data analysis software, e.g. R, Python
- Strong analytical skills, able to get to the core issue of complex problems
- Able to write insightful reports of results, in particular expressing complex issues in simple terms, understandable by those with no financial background
- Effective multi-tasking and management of deadlines

Required Attributes

- Responsive to client needs and able to deliver solutions that meet those needs
- Takes the initiative
- Self-motivated to perform in a demanding business environment and to assume a wide range of responsibilities
- Innovative and consistently looking to improve processes
- Focused on delivery and committed to seeing projects through to their close
- Strong attention to detail
- Not afraid to express an opinion and offer new solutions

Remuneration

Competitive salary plus performance bonus

Application Procedures

Please submit your curriculum vitae and a cover letter explaining why you are interested in Fideres and why you are interested specifically in this position to the email address specified below:
